ROAD BIKES COLLECTION

concorde
it's like flying

introduction

Smooth, comfortable and fast, almost like flying, is what a perfect Road Bike should feel like. Since more than 15 years Concorde Bikes are winning the greatest races as well as serving many thousand enthusiastic cyclist around the world.

This year we introduce our new line of aluminium frames and bikes and the new top-of-the-line Vesuvio with carbon-monocoque Razorblade frame and famous Shimano Dura Ace groupset.

Naturally we care a lot about aerodynamics and so you will find new aero-wheels on the four top-of-the-line road bikes.

Our experience, pride and technology, results in this new line of bikes, which gives you the ride of a life time.

Enjoy your flight.

road bikes

Concorde, the heart and soul

"The heart of the bike" is what you could call the frame and fork. From page 8 on you will find all the details about our Razorblade-Carbon fibre frame, the new USA-made superlight Aluminium and Italian handcrafted-"steel-is-real" frames.

To equip the bike we have picked a choice of the world's best components. Durability, function, aerodynamics and ergonomics are our leading stars. Shimano groupsets, including the brand-new Ultegra 18- speed combine great technology and lowest possible weight. 3ttt bars and stems will

ensure a relaxing grip and a safe ride. For the wheels it was easy to find the excellent "french connection": Mavic and Michelin will fly

you from Paris to Roubaix and back. Revolutionary Prym Z-Aero spokes will propeller you forward.

For safety and comfort reasons there are Look pedals mounted which are designed to convert your power into speed with highest efficiency.

If you are looking for a Road Bike made with caring attention to details, the latest technologies in materials and design, just take a good look at the following pages, we are sure you will find what you are looking for.

vesuvio

Features

- Carbon frame & fork
- Shimano Dura Ace 18-speed
- Max Flite saddle
- Mavic CXP 30 rims
- Wippermann Connex 905 chain
- Michelin Super Comp. HD tires
- Prym Z-Aero spokes
- Look 256 pedals

ade to meet the highest demands, the Vesuvio is capable to win any road race on this planet. The performance of the aerodynamic Razorblade carbon fibre frame in combination with Shimano's Dura Ace 18 speed groupset is almost unbeatable.

The brand-new superlight Aluminium frame with the same equipment as the Vesuvio makes this bike an affordable favourite of serious amateur racers. It is very comfortable, reliable and as light as can be.

When we were working on our new super-light aluminium frames we thought it would make a lot of sense to use it to create a bike, perfect for sports and fun. It rides and feels like a professional bike but still saves you the ticket for your next spring Mallorca training week.

This is for good reasons the top selling Concorde of the last years. The tig- welded CrMo frame makes a solid and long-lasting base for intensive use. Shimano RX 100 components do not only look like the expensive high- end stuff, but offers the same comfort and function.

Have you been riding a Road Bike lately? Did it have STI shift-brake levers. They have been invented for professional racers which need a quick shift during the race, but they are great for everybody who wants a safe and comfortable ride. That is why you find them on the Stelvio, together with our classic steel frame and the complete Shimano RSX groupset.

This is our very special offer to beginners and recreational riders. The Treviso will be a reliable good companion for many a thousand miles. You will find all the big brands of components to make sure everything works perfectly.

The Concorde Frame Gallery

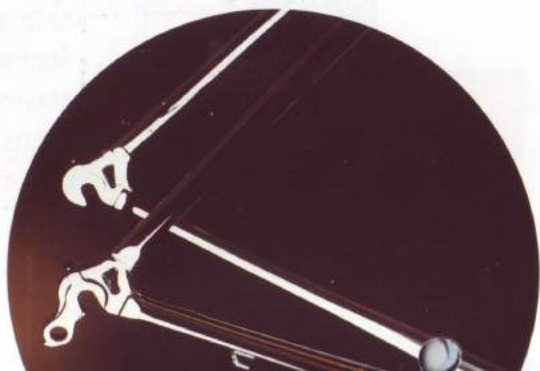

the three leading frame building technologies you can get from us to make the heart of your great road racing bike.

The "Razorblade" is made completely from carbon fibre with aluminium inserts for the headset, seat stays and aluminium replaceable dropouts. Its shape is as aerodynamic as the name says and it will give that little extra speed that may make the difference between a second place and a victory. This carbon fibre frame will also give you a very comfortable ride due to its shock absorbing characteristics, and is extremely strong and durable so you can enjoy its qualities for very many years.

The brandnew "Team SL" superlight aluminium frame is designed to an optimal stiffness-to-weight ratio. At a mere 1.4 kg. for the frame you will feel the stiffness of the rear triangle pushing the bike hard uphill as you will experience its stable and easy high speed downhill performance. Beautiful smooth-weld and full heat-treatment ensures highest strength and durability. You are a fan of steel frames?

So you will probably know all the neat details and special tubesets being developed lately. But you really should have one of those frames in your hands to judge them and find the right one for you.

frames

Razorblade

Frame : Carbon
Design : 6-8 per cm
Size : 53, 56, 59, 62
Colors : all (page 10)
Weight : 1459 g. (56 c/c)

CONCORDE
ROAD BIKES

Warranty
Through our structured distributors and dealer network we are able to respond quickly to any possible warranty claim. The specific warranty covering for your Concorde is determined by the country in which it was bought. Claims can only be accepted when you have bought your Concorde at an authorised dealer of Concorde Roadbikes.

Limited Warranty
Bikes are warranted against defects in materials and workmanship for life when you are the first owner. Components are warranted by their manufacturer. Additional tuning of the bike (components not original found on the bike) can not be warranted by Concorde.
